Architectural Engineering in Technology

As an AET graduate with a background in design, I thrive in a dynamic environment and am confident in my decision-making ability. A quick learner, creative thinker and problem-solver, I'm experienced in Adobe Illustrator, AutoCad, Microsoft Office and other related technologies. When I'm not coding, I'm chasing after my kids, supporting my military spouse and managing properties as part owner of Oliver Rebuild LLC.

TECHNICAL SKILLS

Full Stack Developer: Ruby | Rails | SQL | PostgreSQL | Javascript | React | Redux | HTML/CSS | REST APIs
A.E.T.: Adobe Illustrator | Creative Cloud | Sketch-up | Revit | AutoCad | 2020 | Microsoft Word, Excel, Powerpoint

TECHNICAL PROJECTS

Beyond the Blend Market - JavaScript Frontend w/Rails API backend: [Github](#) | [Demo](#)

Educational single page web app that displays products for a local family owned coffee shop.

- Manages JavaScript Frontend with a Rails API backend application.
- Handles asynchronously (AJAX) calls and uses JSON as the communication format.
- Uses Object Oriented JavaScript to encapsulate related data and behavior.

A Perfect Blend - Ruby on Rails: [Github](#) | [Demo](#)

Basic ecommerce like app that displays relevant information of a local coffee shop in Berwick, Pa.

- Authenticates users at login by encrypting identifying account info and using BCrypt and OAuth.
- Includes a many-to-many relationship implemented with has_many :through associations. Has a join table that admits a user-submittable attribute.
- Implements MVC architecture that also includes RESTful routes.

Portfolio - Drafts & Designs:
